

# Mark Scheme (Results)

Summer 2016

Pearson Edexcel GCE  
in Chemistry (8CH0) Paper 02  
Core Organic and Physical Chemistry

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk) for our BTEC qualifications. Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson.

Their contact details can be found on this link:  
[www.edexcel.com/teachingservices](http://www.edexcel.com/teachingservices).

You can also use our online Ask the Expert service at [www.edexcel.com/ask](http://www.edexcel.com/ask). You will need an Edexcel username and password to access this service.

### **Pearson: helping people progress, everywhere**

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
- Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:
  - i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear
  - ii) select and use a form and style of writing appropriate to purpose and to complex subject matter
  - iii) organise information clearly and coherently, using specialist vocabulary when appropriate

## Using the Mark Scheme

Examiners should look for qualities to reward rather than faults to penalise. This does NOT mean giving credit for incorrect or inadequate answers, but it does mean allowing candidates to be rewarded for answers showing correct application of principles and knowledge. Examiners should therefore read carefully and consider every response: even if it is not what is expected it may be worthy of credit.

The mark scheme gives examiners:

- an idea of the types of response expected
- how individual marks are to be awarded
- the total mark for each question
- examples of responses that should NOT receive credit.

/ means that the responses are alternatives and either answer should receive full credit.

( ) means that a phrase/word is not essential for the award of the mark, but helps the examiner to get the sense of the expected answer.

Phrases/words in **bold** indicate that the meaning of the phrase or the actual word is **essential** to the answer.

ecf/TE/cq (error carried forward) means that a wrong answer given in an earlier part of a question is used correctly in answer to a later part of the same question.

Candidates must make their meaning clear to the examiner to gain the mark. Make sure that the answer makes sense. Do not give credit for correct words/phrases which are put together in a meaningless manner. Answers must be in the correct context.

### Quality of Written Communication

Questions which involve the writing of continuous prose will expect candidates to:

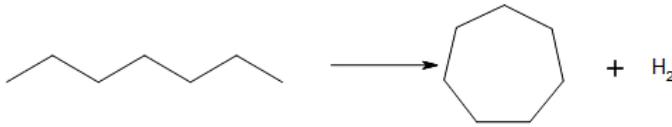

- write legibly, with accurate use of spelling, grammar and punctuation in order to make the meaning clear
- select and use a form and style of writing appropriate to purpose and to complex subject matter
- organise information clearly and coherently, using specialist vocabulary when appropriate.

Full marks will be awarded if the candidate has demonstrated the above abilities.

Questions where QWC is likely to be particularly important are indicated (QWC) in the mark scheme, but this does not preclude others.

Question Number	Answer	Mark
1(a)	B (2,3-dimethylhexane)	(1)

Question Number	Answer	Mark
1(b)	A (3)	(1)

Question Number	Acceptable Answers	Additional Guidance	Mark
1(c)	<ul style="list-style-type: none"> <li>correct <u>skeletal</u> formulae for heptane and cycloheptane (1)</li> <li>formula for hydrogen (1)</li> </ul>	<p>Mark independently but max 1 if additional reactants and/or products or more than 1 mole/molecule of hydrogen</p>  <p>Do not allow just structural or displayed formulae for the organic reactant or product, or any combination of formulae, for M1</p> <p>Ignore additional formulae written as working</p> <p>Ignore shape of heptagon, provided it has 7 sides</p> <p>Ignore any conditions, even if incorrect</p>	(2)

Question Number	Answer	Mark
1(d)(i)	D ( $\sigma$ , homolytic)	(1)

Question Number	Acceptable Answers	Additional Guidance	Mark
1(d)(ii)	<ul style="list-style-type: none"> <li>• <math>\text{C}_2\text{H}_6 + \text{Cl}\cdot \rightarrow \text{C}_2\text{H}_5\cdot + \text{HCl}</math>     <b>(1)</b></li> <li>• <math>\text{C}_2\text{H}_5\cdot + \text{Cl}_2 \rightarrow \text{C}_2\text{H}_5\text{Cl} + \text{Cl}\cdot</math>     <b>(1)</b></li> </ul>	<p>Equations can be in either order</p> <p>Allow correct structural / displayed / skeletal formulae</p> <p>Allow dots / circles anywhere on formula</p> <p>Allow 1 mark for two correct steps but using the incorrect alkane / bromine</p> <p>Allow 1 mark if both propagation steps correct but initiation / termination steps also written and not labelled as such or additional incorrect propagation step(s)</p> <p>Ignore state symbols and curly arrows, even if incorrect</p> <p>Penalise missing dots once only</p> <p><b>Comment:</b> If <math>\text{C}_2\text{H}_5^+</math> appears in both equations but equations are otherwise correct, allow 1 as TE</p>	<b>(2)</b>

Question Number	Acceptable Answers	Additional Guidance	Mark
<b>1(d)(iii)</b>	<ul style="list-style-type: none"> <li>• (two) ethyl/ <math>C_2H_5^{\cdot}</math> radicals react together</li>   <li><b>or</b></li> <li><math>C_2H_5^{\cdot} + C_2H_5^{\cdot} \rightarrow C_4H_{10}</math></li> </ul>	<p>Allow <math>C_2H_5 + C_2H_5 \rightarrow C_4H_{10}</math></p> <p>Ignore termination</p> <p>Ignore just '(two) radicals react together'</p> <p>Ignore ethane radicals / ethyl groups</p> <p>Do not allow molecules / ions</p> <p>Do not allow incorrect radicals or product</p> <p>Do not allow initiation / propagation / elimination / substitution</p>	<b>(1)</b>

**(Total for Question 1 = 8 marks)**

Question Number	Answer	Mark
2(a)	D (Z-2-bromo-1-chloroprop-1-ene)	(1)

Question Number	Answer	Mark
2(b)(i)	A (electrophilic addition)	(1)

Question Number	Answer	Mark
2(b)(ii)	<p><b>C</b></p>	(1)

Question Number	Acceptable Answers	Additional Guidance	Mark
2(c)(i)	<ul style="list-style-type: none"> <li>(yield) decreases / lower yield</li> </ul>	<p>Allow less ethanol is produced</p> <p>Ignore equilibrium shifts to the left but do not allow equilibrium shifts to the right</p> <p>Ignore any reference to Le Chatelier's principle</p> <p>Do not allow high temperature favours the exothermic direction</p>	(1)

Question Number	Acceptable Answers	Additional Guidance	Mark
2(c)(ii)	<ul style="list-style-type: none"> <li>(yield) decreases / lower yield</li> </ul>	<p>Allow less ethanol is produced</p> <p>Ignore equilibrium shifts to the left but do not allow equilibrium shifts to the right</p> <p>Ignore any reference to Le Chatelier's principle</p> <p>Ignore fewer collisions</p>	(1)

Question Number	Answer	Mark
2(c)(iii)	<p>D <math>\left( \frac{[\text{C}_2\text{H}_5\text{OH}(\text{g})]}{[\text{C}_2\text{H}_4(\text{g})][\text{H}_2\text{O}(\text{g})]} \right)</math></p>	(1)

(Total for Question 2 = 6 marks)

Question Number	Acceptable Answers	Additional Guidance	Mark
3(a)(i)	<ul style="list-style-type: none"> <li>ionic equation</li> </ul>	<p><u>Example of equation:</u>  <math>\text{CH}_3\text{CH}_2\text{CHBrCH}_3 + \text{OH}^- \rightarrow \text{CH}_3\text{CH}_2\text{CHOHCH}_3 + \text{Br}^-</math></p> <p>Allow  <math>\text{CH}_3\text{CH}_2\text{CHBrCH}_3 + \text{H}_2\text{O} \rightarrow \text{CH}_3\text{CH}_2\text{CHOHCH}_3 + \text{H}^+ + \text{Br}^-</math></p> <p>Allow displayed /skeletal formulae or any combination of these formulae provided the correct organic molecules are shown</p> <p>Ignore any working before the final equation, even if not crossed out</p> <p>Ignore equation with molecular formulae</p> <p>Ignore state symbols, even if incorrect</p> <p>Do not allow just an equation with uncanceled <math>\text{K}^+</math> ions</p>	<b>(1)</b>

Question Number	Acceptable Answers	Additional Guidance	Mark												
3(a)*(ii)	<p>This question assesses a student's ability to show a coherent and logically structured answer with linkages and fully-sustained reasoning.</p> <p>Marks are awarded for indicative content and for how the answer is structured and shows lines of reasoning.</p> <p>The following table shows how the marks should be awarded for indicative content.</p> <table border="1" data-bbox="376 639 891 1007"> <thead> <tr> <th data-bbox="376 639 622 820">Number of indicative marking points seen in answer</th> <th data-bbox="622 639 891 820">Number of marks awarded for indicative marking points</th> </tr> </thead> <tbody> <tr> <td data-bbox="376 820 622 855">6</td> <td data-bbox="622 820 891 855">4</td> </tr> <tr> <td data-bbox="376 855 622 890">5-4</td> <td data-bbox="622 855 891 890">3</td> </tr> <tr> <td data-bbox="376 890 622 925">3-2</td> <td data-bbox="622 890 891 925">2</td> </tr> <tr> <td data-bbox="376 925 622 960">1</td> <td data-bbox="622 925 891 960">1</td> </tr> <tr> <td data-bbox="376 960 622 995">0</td> <td data-bbox="622 960 891 995">0</td> </tr> </tbody> </table> <p>The following table shows how the marks should be awarded for structure and lines of reasoning.</p>	Number of indicative marking points seen in answer	Number of marks awarded for indicative marking points	6	4	5-4	3	3-2	2	1	1	0	0	<p>Guidance on how the mark scheme should be applied:</p> <p>The mark for indicative content should be added to the mark for lines of reasoning. For example, an answer with five indicative marking points that is partially structured with some linkages and lines of reasoning scores 4 marks (3 marks for indicative content and 1 mark for partial structure and some linkages and lines of reasoning). If there are no linkages between points, the same five indicative marking points would yield an overall score of 3 marks (3 marks for indicative content and no marks for linkages).</p>	(6)
Number of indicative marking points seen in answer	Number of marks awarded for indicative marking points														
6	4														
5-4	3														
3-2	2														
1	1														
0	0														

	Number of marks awarded for structure of answer and sustained line of reasoning
Answer shows a coherent and logical structure with linkages and fully sustained lines of reasoning demonstrated throughout.	2
Answer is partially structured with some linkages and lines of reasoning.	1
Answer has no linkages between points and is unstructured.	0

**Comment:**

Look for the indicative marking points first, then consider the mark for structure of answer and sustained line of reasoning

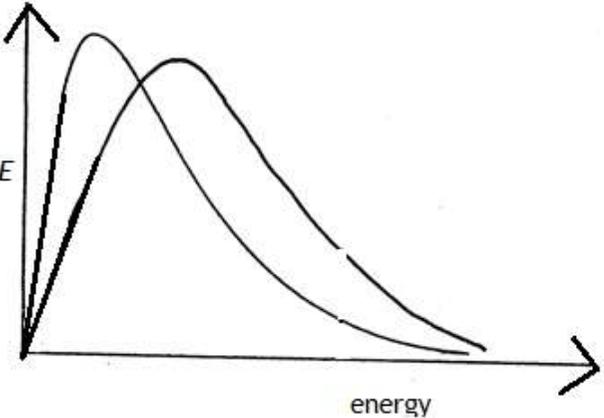

In general it would be expected that 5 or 6 indicative points would get 2 reasoning marks, and 3 or 4 indicative points would get 1 mark for reasoning, and 0, 1 or 2 indicative points would score zero marks for reasoning.

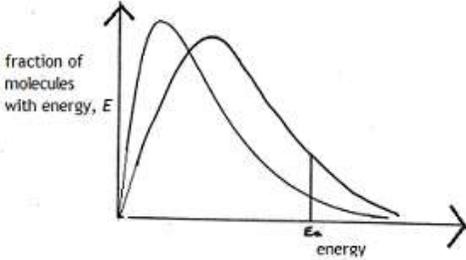

If there is any incorrect chemistry, deduct marks from the reasoning mark, for example:

If a hydroxide solution is used, deduct 1 mark from reasoning mark

If colours of precipitates are incorrect, deduct 1 mark from reasoning mark

	<p><b>Indicative content</b></p> <ul style="list-style-type: none"> <li>• <b>Ethanol</b> – use of ethanol as a solvent (added to each halogenoalkane / liquid in separate containers)</li> <li>• <b>Fair test</b> – use of equal volumes/amounts / specified volumes/amounts in each tube <b>or</b> warm the tubes in a water bath / specified temperature / room temperature</li> <li>• <b>Silver nitrate</b> - silver nitrate (solution) / Ag<sup>+</sup>(<u>aq</u>) to each tube (of halogenoalkane)</li> <li>• <b>Time</b> - find the time taken for a precipitate to form</li> <li>• <b>Rate</b> - expected trend is 2-iodobutane &gt; 2-bromobutane &gt; 2-chlorobutane <b>or</b> 2-iodobutane is the fastest <u>and</u> 2-chlorobutane is the slowest</li> <li>• <b>Bond enthalpy</b> - bond enthalpy C-I &lt; C-Br &lt; C-Cl / decreases from C-Cl to C-I / C-Cl is the strongest <u>and</u> C-I is the weakest / C-X bond strength decreases down the group (of halogens)</li> </ul>	<p>Allow description of experiment from a labelled diagram</p> <p>Ignore nitric acid / HNO<sub>3</sub></p> <p>Allow find how quickly the precipitates form</p> <p>Allow time taken for 2-iodobutane &lt; 2-bromobutane &lt; 2-chlorobutane Allow I<sup>-</sup> forms first, Cl<sup>-</sup> forms last Allow the halogenoalkanes get more reactive from chloro to iodo / 'down the group' Allow reverse trends</p> <p>Allow 'the bond enthalpy decreases down the group' or a comparison of bond enthalpy in 2-iodobutane and 2-chlorobutane</p> <p>Ignore references to bond length / bond polarity / electronegativity / effective nuclear charge</p>
